Tribal Court - Tools and Technology Survey

Welcome!

The Center for Court Innovation wants to learn about the assets and needs of tribal courts, with a focus on client/defendant assessment tools and management information systems and technology. We want to work with tribes to develop a culturally appropriate client assessment tool and technological solutions to keeping track of criminal justice data and facilitate communication between agencies. This survey is the first step towards achieving those goals.

The survey will take approximately 40 minutes to complete. The best person to fill in this survey is someone who knows about assessment and data collection in your agency. Please forward the link to this survey to that person if it is not you. Alternatively, you may request an electronic copy of the survey to fill in with other people and email your responses to us.

Your participation in the survey is voluntary and you may stop at any time. However, we greatly appreciate your contribution and taking the time to fill out this survey. To show our appreciation, we will have an optional drawing for one \$150 VISA gift card for use for your agency or program.
